Product Introduction

About NEXX360

System

System Appearance

81.5mm(W) × 142.8mm(H) × 26.5mm(D), 252g

Features

- High performance ARM processor - Basic 64GB memory card

- Battery life (Up to 8 hours)
- : Built-in Li-Polymer main battery (Up to 2 hours) + External Li-ion battery (Up to 6 hours)

Neck camera

Neck camera Appearance

Normal Neck: 172.7mm(W) × 164.7mm(H) × 90.5mm(D), 255g

Big Neck: 194.7mm(W) × 166.4mm(H) × 90.5mm(D), 270g

Features

- 4 HD cameras (1280 x 720)
- F2.0
- Angle of view: Diagonal 133° each
- Noise reduction (2D-NR, 3D-NR)

Product Introduction

About NEXX360

Cradle

Cradle Appearance

133.7mm(W) × 175.7mm(H) × 63.1mm(D), 375g

External interface

Cradle: System port, external battery port, LAN port, DC-power

External battery

External batter Appearance

87.4mm(W) × 149.9mm(H) × 56.6mm(D), 379g

Button to check the remaining battery

Charging and data transmission connector

Features & Benefits

NEXX360 Features and Benefits

ANYONE

Available for various applications

Police

Security

Safety & Rescue

First Responders

ANYWHERE

From anywhere you can record/live stream the video without blind spots

Department Store

Airport

Construction Site

ANYTIME

Regardless of the time or the place, the field site can be monitored in real-time

Field

Control Center

EASY

Do not have to mount cameras like existing CCTV systems

Before

Existing CCTV systems require cable management and extensive setup

After

Very simple to start recording. just wear it

Compatibility of NEXX360

Easy to apply AI technology such as face/object/situation recognition

Compatible with multiple video management systems (VMS)

Supports ONVIF/RTSP protocols

Integrates with various AI technologies

By supporting ONVIF/RTSP protocols, it is compatible with multiple 3rd party VMS

SMART SOLUTION

NEXX360 SMART SOLUTION

- NEXX360 transmits videos in real time via 5G/LTE network.
- As a wearable CCTV that can move freely, it is highly convenient and efficient.
- A better system to deal with existing safety and security issues.

1 SMART FACTORY

Help promote worker safety and OSHA compliance

Access Control Security Workplace Accident Prevention

2 SMART CONSTRUCTION

Able to ensure workers are wearing safety equipment and manage project oversight the site effectively from a remote location.

Intelligent video analysis 360° construction journal

3 SMART EMERGENCY

Allows remote viewing by more experienced personnel

Emergency Rescue Fire Detection Marine Safety

4 SMART COMMUNICATION

Enables workers to work hands-free.

Remote Technical Support Visiting Nursing Service Remote Reporting

VARIOUS SERVER-LINKED COMMUNICATION METHODS

LTE / 5G

Smartphone tethering or use LTE(5G) dongle/egg/modem

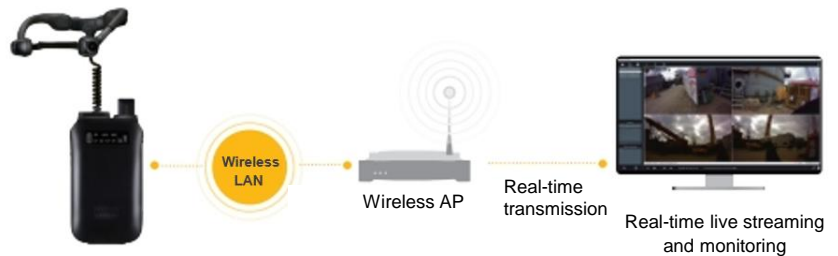

- Real-time live streaming and monitoring
- Records live in the cloud
- Use existing phone/dongle
- No restriction on the distance/location of transmitting videos

Wireless LAN

Real-time videos via Wireless AP

- Real-time transmission
- No communication cost

FTP server upload

- Save images on a memory card
- Upload videos to the designated server by wire
- Stable connectivity

Wired connection

- Real-time live streaming and monitoring
- Saves videos in a memory card
- Upload video stored on the server by wire
- Stable connectivity

SPECIFICATION

• Camera

Image Sensor	1/2.9" Sony Exmor CMOS	Focal length	3.0mm
Lens Type	Fixed lens ×4	Maximum aperture value	F2.0
View angle	133° ×4	Maximum illumination	1.0 Lux, F2.0

• Video

Compression codec	H.264	Video saving format in memory card	AVI
Bandwidth	512Kbps ~ 8Mbps		
Frame rate	Live streaming: Max 15fps@ 1920X1080	Resolution	Live streaming: 720X480, 1280X720, 1920X1080
	Saving in memory card: Max 15fps@1280X720 LensX4		Saving in memory card: 1280x720 LensX4

• Audio

Compression	G.711
Sampling	16KHz
Bandwidth	128Kbps

• Certification

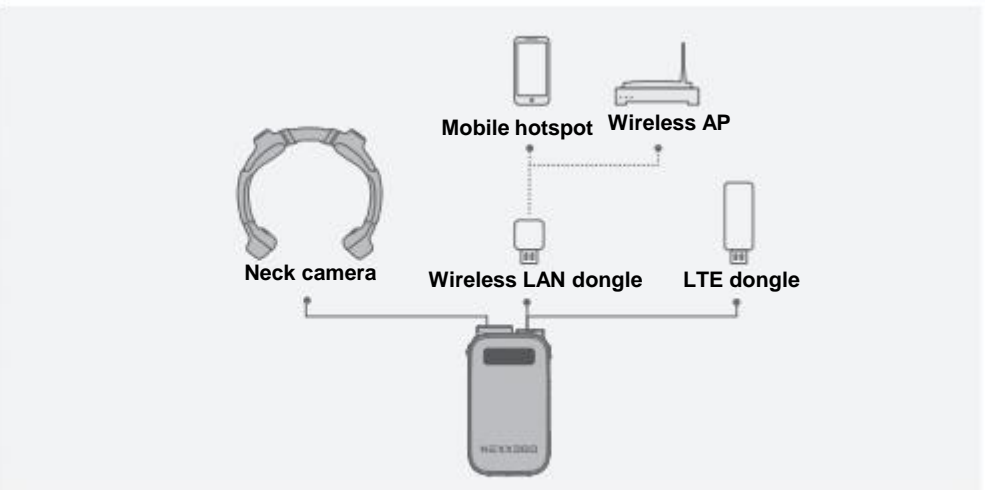

IP code	IPX5	System	CE, FCC, KC, VCCI	Cradle	CE, CEC, DOE, FCC, KC, VCCI
UL94	Main parts of Neck camera, System: V0 Rubber of Neck camera: HB	External battery	CB, KC, PSE, UN38.3	Wireless dongle	CE, FCC, KC, TELEC

• External interface

USB	USB 2.0 Type A	Speaker	Beep sound speaker
Microphone	Built in MIC	5G	Supported (Wireless version only)* Supported with dongle
Wireless LAN	Supported (Wireless version only) *Supported with dongle(IEEE802.11 b/g/n)	LTE	Supported (Wireless version only) * Supported with dongle

• Specifications of parts

Peripheral device	External battery / Wireless LAN dongle / LTE dongle / Cradle	Size	Normal neck: 172.7mm(W)×164.7mm(H)×90.5mm(D) Big neck: 194.7mm(W)×166.4mm(H)×90.5mm(D) System: 81.5mm(W)×142.8mm(H)×26.5mm(D) Cradle: 133.7mm(W)×175.7mm(H)×63.1mm(D) External battery: 87.4mm(W)×149.9mm(H)×56.6mm(D)
Storage	Memory card: Max 64GB		
Power supply	Battery usage time Built-in battery: Approx. 2 hours External battery: Approx. 6 hours	Weight	Neck camera Normal neck: 255g Big neck: 270g System: 252g External battery: 379g Cradle main unit: 375g
	Charging time Built-in battery: Approx. 2 hours External battery: Approx. 6 hours		
Power	Cradle DC 19V / 3.42A(65W)
